

## WORK SAFETY TRAINING SETS

### A01 FOOT SAFETY TRAINING SET

Foot safety training set is designed in order to comprehend the importance of the use of safety boots in terms of occupational safety. The protective effect of safety boots can be shown by applications. In this way, it is ensured that the employees are made aware of the importance of the usage of safety boots. After seeing this application, the employees will prefer to use safety boots voluntarily without the need for any warning.

In order to prevent a negative situation during the training, 3 sides of the training set are covered with transparent plastic and the back is covered with black plastic. There is a cover on the front to interfere with the training set. The system does not work when the cover is open.

It is easy to carry and install. All the equipment used is selected from corrosion-resistant materials. All control equipment is placed on the panel and written explanations are added on the panel. Optionally, the logo can be printed on the control panel. A user manual is also provided with the training set.
